

THE COURT OF THE DRAGON

A WARBAND FOR TRENCH CRUSADE

THE DAMNED OF WALLACHIA

In the year 1573, when Byzantium had fallen and the Infernal advance crept north, the Sacred Order of the Dragon held the line in the hills of Wallachia. A million Heretics were impaled in those hills, and Heaven called it a miracle.

It was no miracle. It was a bargain.

The knights of the Order had gone to the Scholomance — the Devil's school hidden beneath the Carpathian peaks — and struck a pact for power enough to hold. Immortality. Blood-sorcery. The strength to drink the war itself. They took the loan meaning never to repay it: to turn Hell's own gift against Hell's own servants, and to keep the borrowed eternity for themselves.

Heaven named them apostates and shut its gates. Hell, whose every law is written in contracts and collateral, named them thieves — for in the theology of the Pit there is no sin worse than welshing on a debt. So the Court belongs to neither power. They are hunted by the angels they betrayed and the devils they cheated, and they answer to no master at all.

They answer only to the blood. For the power the Order stole was never truly theirs — they drank it, long ago, from three things older and hungrier that still sleep in the crypts beneath Castle Dracula. The Voivode rules the Court, deadliest of all his kind; yet even he is a child beside the Elders downstairs, from whose veins his own gift first came.

Now they march to the great war in greatcoats and grave-dust, a handful of immortal predators trailing a herd of the dominated and the bled. They are slow. They are few. And the longer the killing lasts, the stronger they become.

SPECIAL RULES

These rules apply to every Court of the Dragon Warband.

SATED MARKERS

The Court's power is measured in SATED MARKERS, blood harvested from others, kept entirely separate from BLOOD MARKERS.

BLOOD MARKERS on a Court model function as normal: your opponent may spend them against your rolls — they are a weakness. SATED MARKERS are the Court's strength, fuelling its states and abilities. A model can hold a maximum of 6 Sated Markers. Track them with a distinct counter.

The Feed ACTION: a model with the FEED keyword may take a Feed ACTION against an enemy model, or a friendly non-VAMPIRE model, within 1" that has no BLESSING MARKERS and does not have the ARTIFICIAL keyword, then take a Risky Success Roll. On a Success, place 1 BLOOD MARKER on that model and the feeding model gains 1 SATED MARKER. Feed is a Risky action — a failure ends the Activation — so it is usually taken last.

THE STATE LADDER

Every vampire model checks its Sated total to determine its state: Base (0-2 Sated), Ascended (3-4 Sated), Blood-Crazed (5-6 Sated).

A model's state is locked at the start of its Activation and does not change until the start of its next Activation, even if it gains or spends Sated in between. A model may use only one ability that costs Sated per Activation.

BLOOD-CRAZED BEHAVIOUR

A Blood-Crazed model may take no ACTION other than Move, Dash, Charge or Fight, and must take a Charge ACTION if it is able to. Which model it must Charge is determined by The Leash.

THE LEASH

Each time a friendly Blood-Crazed model is Activated, check for a friendly DOMINION model within 6". In range: it must Charge the nearest enemy model. Not in range: it must Charge the nearest model, friend or foe. While no friendly DOMINION model is on the battlefield, every friendly Blood-Crazed model is loose and must Charge the nearest model, friend or foe.

UNDEAD FORTITUDE

Court vampires do not bleed out as mortals do. A model with the VAMPIRE keyword relies on REGENERATE rather than on medical treatment: it cannot benefit from a Medi-kit, and no Treat ACTION may be carried out on it.

THE BETRAYED CHURCH

The Court are apostates. Models attacking a Court model gain +1 INJURY DICE if they have one or more BLESSING MARKERS.

GRAVE-LAW

A model may reform (return from Out of Action) no more than once per game, regardless of source.

ARMOURY RESTRICTIONS

The Court may not take FIRE weapons, and no Court model may wear Machine Armour — the Order predates the machine, and dead flesh will not be bolted into it. Effects that would grant Machine Armour grant nothing.

NEW KEYWORDS

DRAGON COURT — This model is part of the Court of the Dragon faction.

FEED — A model with the FEED keyword may take the Feed ACTION (see Sated Markers) to harvest Sated from a valid target.

VAMPIRE — A deathless lord of the Court. VAMPIRE models use Sated Markers and the State Ladder, and cannot be targeted by their own faction's Feed ACTION.

DOMINION — A model with the DOMINION keyword holds the Leash. Friendly Blood-Crazed models within 6" of a DOMINION model must Charge the nearest enemy model rather than the nearest model of any kind.

THE BLOODLINES

The Court's power flows from three Elders sleeping in the crypts beneath Castle Dracula — the things the Voivode himself first drank from.

Pledge. At Warband creation, each **ELITE** vampire pledges to **one** Elder as its origin blood. This is per-model: a Warband may field a Mara Voivode beside a Cazimir Boyar. Origin blood is fixed and never changes. Pledging grants access to that Elder's **Elder Blood** purchase.

Elder Blood — bought with ducats at Warband creation. A vampire may take **1** Elder Blood gift, from its pledged Elder only.

Bloodline Ladders — earned in campaign. Every Elder has a three-rung ladder. An ELITE vampire may climb **any** Elder's ladder, not only its pledged one — power pulls the blood. Each ladder is climbed **bottom-up**: a rung may be taken only if the rung below it on that ladder is already held.

Advancement — choose, don't roll. When a Court ELITE vampire would make an Advancement Roll, it does not roll on the standard Skill Tables. Instead, choose any one Bloodline rung the model is currently eligible for and the model learns it.

MARA, THE RED FAMINE

The eldest and hungriest. Her blood is appetite; it climbs by killing and drinking, and it pays the whole Court back.

Elder Blood

- **Glutton for Blood** (25🔥) — its Feed ACTION grants 2 Sated instead of 1.

Ladder

1. **Sate the Kill** — when this model takes an enemy Out of Action with a Melee Attack, it gains 1 Sated (no action, no roll).
2. **Shared Feast** (*needs Sate the Kill*) — whenever this model gains Sated from Feeding or from Sate the Kill, one friendly VAMPIRE within 6" also gains 1 Sated. Once per Activation.
3. ★ **The Red Famine** (*needs Shared Feast*) — while Ascended, its Melee Attacks gain +1 INJURY DICE against any model carrying 1 or more BLOOD MARKERS.

NEGRU VODĂ, THE THRONE OF THORNS

The Black Voivode who ruled these mountains first. His blood is rulership — this ladder grows by holding the leash.

Elder Blood

- **Crown of Dread** (25🔥) — −1 DICE to all Success Rolls for enemy models within 6". With the bearer's FEAR, melee attacks against it suffer −2 in total. A model cannot suffer this penalty from more than one Crown of Dread.

Ladder

1. **Seat of Command** — gains the DOMINION keyword.
2. **The Driven Hunt** (*needs Seat of Command*) — friendly Blood-Crazed models within this model's Leash add +1 DICE to their Melee Attacks.
3. ★ **The Throne of Thorns** (*needs The Driven Hunt*) — enemies treat the area within 6" of this model as Difficult terrain, and while this model is on the battlefield and not Down, your Warband ignores the Shaken rule.

CAZIMIR, THE HUNDRED-GRAVED

Buried a hundred times, risen from every grave. His blood is the curse that will not let the body rest. It climbs by refusing to die.

Elder Blood

- **Unhallowed Flesh** (25🔥) — Injury Rolls against this model suffer −1 INJURY DICE, applied after all other modifiers; this can cancel The Betrayed Church bonus.

Ladder

1. **Knit the Wound** — its REGENERATE value rises by 1.
2. **Rise from the Mire** (*needs Knit the Wound*) — the first time it is taken Down each game, it immediately stands and may move 3". This does not trigger on a Grave-Law reform.
3. ★ **The Hundred Graves** (*needs Rise from the Mire*) — the first time this model would be taken Out of Action each game, it is instead removed and reforms at a friendly board edge at the start of your next Turn with 2 Sated. This does not trigger if the wound was caused by a FIRE or BLESSED attack.

ARMOURY

Items marked [•] are unique to the Court; their rules follow in **Court Battlekit**. Innate weapons are listed on their model's entry.

Ranged Weapons

ITEM	COST
Wheellock Culverin [•]	7🔥
The Arcan [•]	8🔥
Sanguine Arquebus [•]	12🔥
Vein-Seeker Rifle [•] — ELITE only, Limit 3	25🔥

COURT BATTLEKIT [•]

Wheellock Culverin · 1-Handed · 8" · ASSAULT

1-Handed, 8". Thunderous: +1 INJURY DICE against targets within 4".

The Arcan · 1-Handed · 8" · ASSAULT

1-Handed, Thrown, 8". Snared: makes no Injury Roll. On a successful hit, the target may not Dash or Charge until the end of its next Activation.

Sanguine Arquebus · 2-Handed · 18" · CUMBERSOME

2-Handed, 18", CUMBERSOME. Bleeding Shot: place 1 additional BLOOD MARKER on any model wounded by this weapon.

Vein-Seeker Rifle · *2-Handed · 30" · HEAVY*

2-Handed, 30", HEAVY. ELITE only. Hungry Rounds: place 1 extra BLOOD MARKER on a wounded target, and a friendly vampire within 6" of that target may immediately take a Feed ACTION against it as if in contact.

Organ Gun · *2-Handed · 30" · HEAVY · RELOAD · CUMBERSOME*

2-Handed, 30", AUTOMATIC 3, HEAVY, RELOAD, CUMBERSOME. A rack of musket barrels fired in a single volley; a fixed battery, not a mobile gun.

Bombard · *2-Handed · 36" · HEAVY · SCATTER · RISKY*

2-Handed, Indirect, RISKY. Uses the Trench Mortar profile; on a failed Success Roll, place 1 BLOOD MARKER next to the firer as the crude charge misfires.

Draconist Sabre · *1-Handed Melee*

1-Handed Melee. Highborn Edge: while the wielder is Ascended, this weapon gains CLEAVE 2.

Widow's Knives · *1-Handed Melee*

Paired 1-Handed Melee. Waltz of Knives: +1 DICE to the wielder's Melee Attacks; may not carry a Shield. After resolving its Melee Attacks, the wielder may move up to 2"; this move does not count as Retreating.

Grave-Iron Halberd · *2-Handed Melee*

2-Handed Melee, Polearm. Set to Receive: enemies gain no bonus DICE for Charging the wielder. If the wielder did not move this Activation, its Melee Attacks against a model that Charged it this Turn gain +1 INJURY DICE.

Blood-Blade · *1-Handed Melee*

1-Handed Melee. Thirst: the first time this weapon wounds a model each Activation, the wielder gains 1 Sated.

Impaler's Stake · *2-Handed Melee · BLOCK*

2-Handed Melee, BLOCK. The Impaling: when this weapon takes an enemy Out of Action, you may place a permanent Impaled Marker where it stood, then this weapon is lost for the rest of the game. The area within 3" of an Impaled Marker is Difficult terrain for non-DRAGON COURT models.

Sanguine Reaver · *2-Handed Melee · DEADLY*

2-Handed Melee, DEADLY. Voivode only. The Reaver Drinks Deep: each time this weapon takes a model Out of Action, the wielder gains 1 Sated.

Coffin-Lid Pavise · *Shield · SHIELD COMBO*

Shield Combo. As a Trench Shield; in addition, Ranged Attacks against the bearer from more than 12" away suffer -1 DICE.

Grave-Soil Plate · *Armour*

ELITE VAMPIRE only, Limit 1 per Warband. Counts as Standard Armour. Interred: while the wearer has 1 or more BLOOD MARKERS, Injury Rolls against the wearer suffer an additional -1 INJURY MODIFIER.

Shroud of the Bled · *Armour*

Grants no INJURY MODIFIER. Pauper's Ward: the first time each game the wearer would be taken Out of Action by a Ranged Attack, it is Down instead.

Coffin of Grave-Soil · *Equipment*

Buried Advance: instead of deploying normally, this model is held in reserve and enters from any friendly board edge at the start of any of your first two Turns.

Vial of Stolen Blood · *Equipment · CONSUMABLE*

Consumable. Once per game, from your second Turn onward, a vampire that drinks it gains 1 Sated.

Herd-Bell · *Equipment*

Limit 1. A cracked bellwether's bell; the herd has stopped noticing which of them is wearing it. Driven Together: while a friendly Bled is within 6" of a model with a Herd-Bell, the range of its Cattle rule is 6" instead of 3".

A Copy of the Usages · *Equipment*

DOMINION only. The Order's law, copied in a hand that never shook. The bearer's Leash range increases by 2".

Pouch of Grave-Earth · *Equipment* · *CONSUMABLE*

Consumable. A fistful of home soil pressed into the wound. Once per game, at the end of the bearer's Activation, the bearer removes up to 2 additional BLOOD MARKERS.

Grave-Damp Sprayer · *2-Handed* · *8"* · *FLAMETHROWER* · *GAS* · *IGNORE ARMOUR*

2-Handed, 8", -1 INJURY DICE, FLAMETHROWER, GAS, IGNORE ARMOUR. A brass pump and a bladder of tomb air drawn off the deep vaults; it does not burn, it simply is not breathable. Choke-Damp: a Ranged Attack made with a Grave-Damp Sprayer may target a friendly model.

Cârlig · *1-Handed Melee*

1-Handed Melee. A flesh-hook on a short chain; it is not for killing. The Hook Holds: when an enemy model within 1" of a model with a Cârlig takes a Retreat ACTION, place 1 BLOOD MARKER next to that enemy model before any Melee Attacks allowed by the retreat are resolved.

Grave-Sickle · *1-Handed Melee*

1-Handed Melee. The sickle laid at a strigoi's throat before the lid goes down. Laid at the Throat: +1 INJURY DICE against a model that has 1 or more BLOOD MARKERS.

Buzdugan · *1-Handed Melee* · *BLOCK*

1-Handed Melee, BLOCK, +1 INJURY MODIFIER. The voivode's mace of office, unchanged since it was a symbol rather than a tool.

Grave-Iron · *Armour*

Mail buried nine winters and dug up rusted shut. Counts as Standard Armour. Nine Winters Buried: increases the wearer's REGENERATE by 1, to a maximum of REGENERATE (2). The wearer's Movement is reduced by 1".

Censer of Grave-Soil · *Equipment*

Limit 2. Earth from nine graves burned with myrrh in a pierced brass ball; the dead find it comforting, the living cannot breathe it. Grave-Smoke: at the end of this model's Activation, place 1 BLOOD MARKER on 1 enemy model within 8".

Yoke of the Herd · *Equipment*

Leech only. A Bled chained at the shoulder, walking where it is walked. Chained at the Shoulder: at the start of each of the Leech's Activations, if a friendly Bled is within 2", you may make an Injury Roll against that Bled. If you do, the Leech gains 1 Sated.

ELITE WARBAND ENTRIES

THE VOIVODE — 160 🏰

1 per Warband. The first knight of the Order to drink, and the last to repent. Lesser things do not disobey when he is near.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
7"/Infantry	+1 DICE	+3 DICE	0	40mm

Battlekit: The Voivode may take any Battlekit from the Court Armoury and may take a Pistol.

Keywords: DRAGON COURT, ELITE, LEADER, FEAR, TOUGH, STRONG, FEED, VAMPIRE, DOMINION, REGENERATE (2)

Master of the Hunger: The Voivode can never become Blood-Crazed, regardless of his Sated count.

Ascended (Voivode): While Ascended (3+ Sated), the Voivode's Melee Attacks gain +1 INJURY DICE, his Movement becomes 10", and his personal Leash radius extends to 9".

Sated Powers: The Voivode may use one Sated Power per Activation:

- **Crimson Surge** (3 Sated): until the end of his Activation, his Melee Attacks gain CLEAVE 2.

- **Knit the Flesh (X Sated):** remove X BLOOD MARKERS, to a maximum of 2, from himself or a friendly vampire within 6".
- **Crack the Whip (1 Sated):** choose a friendly Blood-Crazed model within 12" and pick its Charge target this Activation.

THE STRIGOI WITCH — 110 🏰

0-1 per Warband. She rules by knowing whose veins answer when she calls.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	+0 DICE	0	32mm

Battlekit: The Strigoi Witch may take any Battlekit from the Court Armoury.

Keywords: DRAGON COURT, ELITE, FEAR, FEED, VAMPIRE, DOMINION, REGENERATE (1)

Blood Sorcery: To cast a spell she pays its BLOOD MARKER cost from any models on the battlefield (friend or foe). She may Overcharge by additionally spending her own Sated, as noted per spell. Each time she casts, she gains 1 Sated.

Ascended (Witch): While Ascended (3-4 Sated), her spell ranges increase by 6", and each spell's BLOOD MARKER cost is reduced by 1 (minimum 1).

Blood-Crazed: The Red Hour: While Blood-Crazed (5-6 Sated), she cannot cast spells, loses DOMINION, and is compelled to charge as any Blood-Crazed model. At the end of her Activation, every model within 6" (friend or foe) suffers an Injury Roll; then remove 1 Sated from her.

Spells: Boiling Veins (pay 2 BLOOD MARKERS): an enemy within 6" suffers an Injury Roll with +1 INJURY DICE. Overcharge: each Sated spent adds +1 INJURY DICE. If 3+ Sated are spent, place 1 BLOOD MARKER on the Witch.

- **Rise, Bleed Again (pay 1 BLOOD MARKER):** a friendly vampire within 6" stands up if Down, and you remove up to 2 BLOOD MARKERS from it. Overcharge: spend 1 Sated to also grant it 1 Sated.
- **Drive the Hunt (pay 3 BLOOD MARKERS):** a friendly Blood-Crazed model within 8" of the Witch immediately makes a Charge ACTION and Fights; the Witch chooses its target. Overcharge: spend 1 Sated; if that Fight takes a model Out of Action, it makes one more Charge and Fight.

THE MOROI — 110 🏰

0-1 per Warband. A higher vampire who hunts alone — heard before she is seen, and rarely seen at all.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
7"/Infantry	+2 DICE	+2 DICE	0	32mm

Battlekit: The Moroi may take any Battlekit from the Court Armoury.

Keywords: DRAGON COURT, ELITE, INFILTRATOR, FEAR, FEED, VAMPIRE, REGENERATE (1)

Deathshriek: Innate Ranged Weapon (8", ASSAULT, BLAST 2"): after resolving the attack, place 1 BLOOD MARKER on each model in the blast.

Stalker's Veil: -1 DICE to Ranged Attacks that target the Moroi.

Vanish (Hide ACTION): While in contact with terrain at least 1/2" high, the Moroi may take a Hide ACTION (Risky Success Roll, +1 DICE). On a Success or Critical Success, enemy models cannot choose the Moroi as the target of a Ranged Attack or Charge until she moves, charges, retreats, makes an attack, or an enemy model moves within 1.5" of her. She can still be hit within the blast radius of a BLAST weapon.

Ascended (Moroi): While Ascended (3-4 Sated), she may take the Hide ACTION even when not in contact with terrain; and when she Charges, she may move through terrain and models at half the rolled Charge distance. If she cannot end this Charge in a legal position in base contact with the target, she instead ends as close to the target as possible and makes an Injury Roll against herself.

Blood-Crazed (Moroi): While Blood-Crazed (5-6 Sated), Blood-Crazed behaviour applies; she loses Deathshriek and Vanish, and her Melee Attacks gain +1 INJURY DICE.

THE BOYAR — 65👑

A knight of the Order of the Dragon, armored and ancient.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	+2 DICE	0	32mm

Battlekit: The Boyar may take any Battlekit from the Court Armoury. It must be recruited with one Order.

Keywords: DRAGON COURT, ELITE, STRONG, FEED, VAMPIRE, REGENERATE (1)

Ascended (Boyar): While Ascended (3-4 Sated), Melee rises to +3 DICE and it gains FEAR, plus its Order's effect.

Blood-Crazed (Boyar): While Blood-Crazed (5-6 Sated), its Melee Attacks gain +1 INJURY DICE and Blood-Crazed behaviour applies.

Orders — chosen when recruited.

- **Order: Feeder** (20👑) — Ascended: when it takes an enemy Out of Action with a Melee Attack, a friendly vampire within 6" gains 1 Sated.
- **Knight-Captain** (20👑) — Any Order. This Boyar gains the DOMINION keyword.
- **Order: Anchor (Deathless)** (25👑) — Ascended adds TOUGH, and REGENERATE rises to (2). Its armour and shield are purchased separately from the Armoury.
- **Order: Hunt (the Huntsman)** (30👑) — Ranged becomes +2 DICE. Ascended: its Ranged Attacks gain IGNORE LONG RANGE and its Ranged Weapons count as having ASSAULT, regardless of weapon carried.
- **Order: Butcher** (40👑) — Ascended: its melee weapon gains CLEAVE 2 and its Melee Attacks gain +1 DICE.

THE IELE — 100👑

0-1 per Warband. She has never lifted a blade. She does not need to — the enemy will do it for her.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	−1 DICE	0	32mm

Battlekit: The Iele may take any Battlekit from the Court Armoury.

Keywords: DRAGON COURT, ELITE, FEAR, FEED, VAMPIRE, DOMINION, REGENERATE (1)

Allure: Enemy models must treat all attacks against the Iele as Risky Success Rolls while within 6" of her.

Beguile (ACTION): Take a Risky Success Roll, +1 DICE. On a Success or Critical Success, choose an enemy model within 12" and move it up to 6" directly toward the Iele. It may be moved within 1" of friendly models (not a charge), off objectives, or out of cover.

Thrall (ACTION): Take a Risky Success Roll, +1 DICE. On a Success or Critical Success, choose an enemy within 12" in Line of Sight; it makes a stripped activation under your control — either Move + one Ranged Attack, or Charge + one Melee Attack — and nothing else.

Ascended (Iele): While Ascended (3-4 Sated), Beguile and Thrall may target enemies within 18", and Allure extends to 9".

Blood-Crazed: The Maddening Dance: While Blood-Crazed (5-6 Sated), Blood-Crazed behaviour applies; she loses Beguile, Thrall, and DOMINION. At the end of her Activation, every other model within 12" (friend and foe) is moved 4" directly toward the Iele, stopping if it contacts another model, impassable terrain, or comes within 1" of her.

TROOPS WARBAND ENTRIES

THE SHRIKE — 70👑

0–4 per Warband. Not sent, but released; it does not stop while anything nearby still moves.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
8"/Infantry	—	+2 DICE	0	32mm

Battlekit: The Shrike has no Battlekit. Its Melee Attacks have CLEAVE 2.

Keywords: DRAGON COURT, INFILTRATOR, FEAR, STRONG, VAMPIRE, REGENERATE (1)

Loosed: Always treated as Blood-Crazed.

The Kill Is Not Its Own: When the Shrike takes an enemy model Out of Action with a Melee Attack, a friendly ELITE VAMPIRE within 6" may gain 1 Sated.

Torn, Not Slain: When a Melee Attack made by the Shrike results in Down, place 1 additional BLOOD MARKER on the target.

From the Dark: Instead of deploying normally, it may be held in reserve and enter from any board edge at the start of any of your Turns.

Rampage: Each time it takes a model Out of Action with a Melee Attack, it must immediately make a Charge ACTION against the nearest model and Fight again — friend or foe. While within a friendly DOMINION model's Leash, it instead charges the nearest enemy. This continues while kills follow; it ends when a Fight fails to take a model Out of Action.

THE LEECH — 65👑

A wall that bleeds for others.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
5"/Infantry	—	+1 DICE	–1	40mm

Battlekit: The Leech may take any Battlekit from the Court Armoury.

Keywords: DRAGON COURT, FEAR, TOUGH, STRONG, VAMPIRE, REGENERATE (2)

Born Crazed: Deploys with 3 Sated (cap 6) and is always treated as Blood-Crazed.

Bloodburn: At the end of each of its Activations, remove 1 Sated.

Glutton: Whenever a model is taken Out of Action within 6" (friend or foe), gain 1 Sated.

Bloodletting: A friendly vampire within 3" may target the Leech with its Feed ACTION: take the Risky roll as normal; on a Success, no BLOOD MARKER is placed — instead transfer 1 Sated from the Leech to the feeder.

Gorged (2+ Sated): Has FEAR, TOUGH, REGENERATE (2), and Transfixing Dread — enemy models within 6" treat each 1" of any move away from the Leech as 2".

Starving (0-1 Sated): Loses FEAR, Transfixing Dread, and TOUGH; REGENERATE drops to (1).

THE STRIX — 25👑

A leather-winged thing loosed at the enemy's rear.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
10"/Flying	—	+0 DICE	0	32mm

Keywords: DRAGON COURT, FLYING

Erratic Flight: -1 DICE to Ranged Attacks that target a Strix.

THE BLEED — 12👑

Walking blood-flasks the Court drives to war.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	–1 DICE	0	25mm

Keywords: DRAGON COURT

Cattle: When a Bled is taken Out of Action by an enemy, a friendly vampire within 3" may immediately gain 1 Sated.

Offer the Vein: Once per Activation, a friendly VAMPIRE within 1" of a friendly Bled may take a Feed ACTION targeting it, adding +1 DICE to the Risky Success Roll. On a Success or Critical Success, place the BLOOD MARKER and the vampire gains its Sated as normal; then make an Injury Roll against the Bled, which may take it Out of Action. On a Failure, the Bled suffers no Injury Roll and the vampire's Activation ends as normal.

MERCENARIES

Neither Shepherd Nor Wolf. For Mercenary recruitment, a Court of the Dragon Warband is neither Faithful nor Fallen. It may not recruit the Mercenaries in Warbands of Trench Crusade — including those available to any Warband — and may instead recruit the Court Mercenaries. Each is 0-1.

THE VEIN-WIFE — 3✳

0-1 per Warband. She knows exactly how much a body can give and still stand at the plough.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	+0 DICE	–1	25mm

Battlekit: The Vein-Wife has Standard Armour, a Gas Mask, a Medi-kit and a Culling Knife.

Keywords: NEGATE X

Stanch the Vein: Once per Turn, when a friendly VAMPIRE resolves a Feed ACTION or Offer the Vein against a friendly Bled within 3", the Bled suffers no Injury Roll and gains no BLOOD MARKER.

An Exact Science: +1 DICE to the Risky Success Roll for a Treat ACTION carried out by the Vein-Wife.

Limited Potential: This model cannot have more than 7 Experience Points.

THE CĂLUȘAR — 2✳

0-1 per Warband. He does not consider himself a mercenary. He is a physician.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	—	+1 DICE	0	32mm

Battlekit: The Călușar has a Trench Club (the ritual staff) and a Sword/Axe (the wooden sword, iron-shod).

Keywords: NEGATE X, TOUGH

The Circle: While not Down, a Călușar counts as 3 models for the purposes of controlling Objectives.

Unmoved: A Călușar cannot be moved by any rule other than its own Activation.

The Dance (ACTION): Take a Risky Success Roll. On a Failure the Călușar's Activation ends. On a Success or Critical Success, remove 2 Sated from a friendly VAMPIRE within 3".

Limited Potential: This model cannot have more than 7 Experience Points.

THE SOLOMONAR — 3✳

0-1 per Warband. Ten scholars enter the Scholomance; nine walk out. He paid, and owes nothing to anyone since.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
6"/Infantry	+1 DICE	+0 DICE	0	32mm

Battlekit: The Solomonar has a Polearm — an iron-shod weather-staff.

Keywords: NEGATE X

The Rain-Book (ACTION): Take a Risky Success Roll. On a Failure the Solomonar's Activation ends. On a Success pick one of the following; on a Critical Success pick one or both. The effect lasts until the start of his next Activation. Hail: -1 DICE to all Ranged Attacks made by any model. Mountain Fog: no model may be targeted by a Ranged Attack made from more than 12" away.

Mist of the Passes: -1 DICE to Ranged Attacks that target the Solomonar.

Limited Potential: This model cannot have more than 7 Experience Points.

THE PRICULICI — 4✳

0-1 per Warband. Some the blood took further down, until the man was gone and only the appetite and the wings remained.

MOVEMENT	RANGED	MELEE	ARMOUR	BASE
10"/Flying	—	+2 DICE	0	40mm

Battlekit: A Priculici cannot have any Battlekit.

Keywords: FEAR, FLYING, FIRETEAM, REGENERATE (1)

Rending Claws: A Priculici can make a Melee Attack with IGNORE ARMOUR even though it has no Melee Weapon.

Prise the Shell: +1 INJURY DICE to Melee Attacks made by a Priculici if the target has the ARTIFICIAL keyword or has a piece of Armour Battlekit.

Sworn to the Blood: When you recruit a Priculici, before adding it to your roster, you can say it will form a FIRETEAM with 1 other model in your Warband. Both models gain the FIRETEAM keyword. This Fireteam is in addition to any other Fireteams your Warband can have.

The Master's Debt: When the Priculici's Fireteam partner is taken Out of Action, the Priculici becomes Blood-Crazed for the rest of the game. While Blood-Crazed its Melee Attacks gain +1 INJURY DICE, it may take no ACTION other than Move, Dash, Charge or Fight, and it must Charge the model that took its partner Out of Action if able, or the nearest enemy model if it cannot.

Limited Potential: This model cannot have more than 7 Experience Points.

GLORY ITEMS

A Court of the Dragon Warband may purchase the Court Glory Items. It may also purchase Glory Items available to any Warband, with two exceptions: it may not purchase a Trench Dog (see The Grey Brothers) or a Sniper Scope (see Nightglass Sight).

ITEM	STIPULATION	COST
The Grey Brothers	Limit 1	1*
Hailstone Phial	Limit 2	2*
Nightglass Sight	VAMPIRE only, Limit 2	2*
Thirsting Rounds	VAMPIRE only, Limit 1	2*
Draconist Collar	ELITE only, Limit 3	3*
The Cask Cart	Limit 1	3*
The Cup of Târgoviște	VAMPIRE only, Limit 1	3*
The Grave-Nail	Limit 2	3*
The Rookery	Limit 1	3*
The Vesper Bell	VAMPIRE only, Limit 1	4*
The Bucium of the Pass	DOMINION only, Limit 1	5*
The Forest of the Impaled	Limit 1	6*

GLORY ITEM CARTULARY [•]

The Grey Brothers

Uses the Trench Dog rules in full — 25mm base, 8"/Infantry, Melee +0 DICE, Armour 0 — including Four Paws, Pack Loyalty (it gains DRAGON COURT), Teeth and Claws, The Dogs of War, and Loyal Hound (+1* for FIRETEAM). Not of the Herd: a vampire that takes a Feed ACTION against a Grey Brother must make an Injury Roll against it, as Offer the Vein. Special Training (+1*) — Sentinel of the Tree Line: enemy models may not use INFILTRATOR to deploy within 12" of the Grey Brother.

Hailstone Phial

8", ASSAULT, BLAST 3", -1 INJURY DICE, IGNORE COVER, SCATTER. A finger of ice hewn from the frozen lake above the clouds, sealed in lead and wax; it does not melt. Hewn from the Frozen Lake: after the attack has been resolved, the area within 3" of the target point is treated as Difficult terrain until the end of the following Turn. This affects all models, friend and foe.

Nightglass Sight

Smoked crystal ground in the cellars of the Scholomance; the lens does nothing a mortal could measure, it simply stops the dark from being far away. Cold Sight: when this Glory Item is given to a model, choose 1 Ranged Weapon that the model has and which does not have the AUTOMATIC or BLAST keyword. That Weapon gains the IGNORE LONG RANGE keyword, and Ranged Attacks made with it add +1 DICE against a target that has 1 or more BLOOD MARKERS. A Nightglass Sight cannot be reallocated during the Quartermaster Step.

Thirsting Rounds

AMMUNITION. A chipped fang set in the mould and the lead poured around it; the tooth does the work wherever the ball lands. Drink at Distance: the first time in each Activation that a Ranged Attack made with the chosen Weapon wounds a model, the firing model gains 1 Sated. This does not happen if the target has 1 or more BLESSING MARKERS or has the ARTIFICIAL keyword.

Draconist Collar

The red cross that lay across their backs has been ground off with a file — not prised away, not lost, filed. The Oath Half-Kept: a model with a Draconist Collar may take a Feed ACTION against a model that has 1 or more BLESSING MARKERS, despite The Sanctified. If the Feed ACTION is a Success or Critical Success, remove 1 BLESSING MARKER from the target and place it next to the feeding model. Grace Does Not Keep: at the end of each Turn, remove all BLESSING MARKERS from models with the DRAGON COURT keyword.

The Cask Cart

A herd drunk dry yields one night's strength; a herd kept yields a cellar. The Tithe, Not the Slaughter: a Cask Cart is not allocated to a model; add it to your Arsenal. At the end of each game, for each friendly Bled that is

on the battlefield and has 1 or more BLOOD MARKERS, your Warband gains 1 Vintage, to a maximum of 3 Vintage per game. See Campaign Play: The Long Hunger.

The Cup of Târgoviște

Represented by a model or marker on a 25mm base. What is in it is not water. Set Out at the Fountain: after you deploy the model that has the Cup, you may also deploy the Cup anywhere on the battlefield more than 6" from any enemy model; that model is then no longer carrying it, and the Cup cannot be moved, attacked or removed for the rest of the game. Drink ACTION: any model, friend or foe, within 1" of the Cup may take a Drink ACTION, removing 1 BLOOD MARKER from it, or 2 BLOOD MARKERS if it is an enemy model; once per game per model. The Debt of Hospitality: if the model taking the Drink ACTION is an enemy model, the closest friendly model with the VAMPIRE keyword gains 1 Sated.

The Grave-Nail

1-Handed Melee, ARMOUR PIERCING. Gravediggers hammer a square iron nail through the skull before the lid goes down, so that what is in the box stays in the box. Drawn out and set into a haft, it keeps the only trick it ever knew.

The Rookery

A wicker loft strapped to the baggage wagon; what lives in it is not tame and is not fed enough to leave. The Loft Is Never Empty: not allocated to a model; add it to your Arsenal. In each game you may deploy 1 Strix in addition to the models in your Warband. It does not count towards your Warband's model count, Threshold Value or Field Strength, and is not counted as part of your Warband for Morale Checks. If it is taken Out of Action, do not roll for its survival — it is replaced free of charge before your next game.

The Vesper Bell

Cast to call a congregation in at dusk; filed of its cross, it still does — the Order only changed which one. Ring for Evensong ACTION: take a Risky Success Roll and add +1 DICE. On a Failure nothing happens and the model's Activation ends. On a Success or Critical Success, choose 1 enemy model within 12" in Line of Sight; for the rest of the game, attacks made against that model by friendly models have the IGNORE ARMOUR keyword. Once successfully used, it may not be used again in the same game.

The Bucium of the Pass

HELD. Four feet of fir wound in cherry bark, made to call a flock down off the mountain before weather; it still does that, but the flock is different. Sound the Recall ACTION: take a Risky Success Roll and add +1 DICE. On a Failure nothing happens and the model's Activation ends. On a Success or Critical Success, until the end of the Turn, friendly Blood-Crazed models within 18" of the bearer are not compelled to take a Charge ACTION and may take any ACTION.

The Forest of the Impaled

The Order learned in 1462 that an army can be turned without being fought. The Practice: not allocated to a model; add it to your Arsenal. After both sides have deployed, place 2 Impaled Markers anywhere on the battlefield more than 12" from any enemy model. What the Sultan Saw: an enemy model within 3" of an Impaled Marker must treat all of its Success Rolls as Risky Success Rolls. This does not apply to Morale Checks.

WARBAND CREATION

- A starting Warband has **700 ducats** (🔥).
- It must include exactly one **Voivode**, who is its Leader.
- It may include no more than **6 models with the ELITE keyword**.
- Each ELITE vampire pledges to one Elder Bloodline (Mara, Negru Vodă, or Cazimir) when it is recruited, and may buy 1 Elder Blood gift from that Elder.
- **Limited Potential:** the Shrike and the Leech cannot exceed 7 Experience Points, even if Promoted to ELITE.
- Mercenaries are hired with Glory (✳) and follow **Neither Shepherd Nor Wolf**.
- Glory Items are purchased with Glory (✳); see **Glory Items**.

- All other limits follow the standard rules of *Trench Crusade*.
-

CAMPAIGN PLAY — THE LONG HUNGER

This replaces the Trauma Step for a Court Warband. All other Campaign Phase steps are unchanged. The herd — the Bled and the Strix — are mortal and live and die by the standard rules. All rates in this rule are provisional.

The Thirst: an ELITE vampire never rolls on the Trauma Table and never gains Battle Scars. Instead, in the Trauma Step, if it was taken Out of Action during the game it gains 1 Thirst Marker. 1 Thirst — Fraying: it becomes Blood-Crazed at 4+ Sated instead of 5+. 2 Thirst — Slipping: halve its Leash ranges, both projected and received. 3 Thirst — Lost: replace its entry on your Warband Roster with a Shrike; its Experience and Skills are gone and its Battlekit moves to your Arsenal.

If the Voivode is Lost, promote one Boyar to Voivode — keeping its Experience, Skills and any Battlekit it can legally carry — or recruit a new Voivode at the Quartermaster Step.

Torpor: the Shrike and the Leech make Survival Rolls as normal Troops, but on a 1-2 they are not removed from your roster — they enter Torpor and miss the next battle.

The Vintage: when your Warband collects Loot in the Exploration Step, you may take any portion of it as Vintage instead of ducats, at 10 ducats = 1 Vintage. Vintage cannot be spent on Battlekit, Glory Items or recruits. In the Quartermaster Step you may spend 10 Vintage to remove 1 Thirst Marker from one vampire, no more than once per Campaign Phase.
